

UNITED METHODIST SOCIAL PRINCIPLES (2004 BOOK OF DISCIPLINE) THE NATURAL WORLD

Par. 160 All creation is the Lord's, and we are responsible for the ways we use and abuse it. Water, air, soil, minerals, energy resources, plants, animal life, and space are to be valued and conserved because they are God's creation and not solely because they are useful to human beings. God has granted us stewardship of creation. We should meet these stewardship duties through acts of loving care and respect. Economic, political, social, and technological developments have increased our human numbers, and lengthened and enriched our lives. However, these developments have led to regional defoliation, dramatic extinction of species, massive human suffering, overpopulation, and misuse and overconsumption of natural and nonrenewable resources, particularly by industrialized societies. This continued course of action jeopardizes the natural heritage that God has entrusted to all generations. Therefore, let us recognize the responsibility of the church and its members to place a high priority on changes in economic, political, social, and technological lifestyles to support a more ecologically equitable and sustainable world leading to a higher quality of life for all of God's creation.

Water, Air, Soil, Minerals, Plants

We support and encourage social policies that serve to reduce and control the creation of industrial byproducts and waste; facilitate the safe processing and disposal of toxic and nuclear waste and move toward the elimination of both; encourage reduction of municipal waste; provide for appropriate recycling and disposal of municipal waste; and assist the cleanup of polluted air, water, and soil. We support measures designed to maintain and restore natural ecosystems. We support policies that develop alternatives to chemicals used for growing, processing, and preserving food, and we strongly urge adequate research into their effects upon God's creation prior to utilization. We urge development of international agreements concerning equitable utilization of the world's resources for human benefit so long as the integrity of the earth is maintained.

Energy Resources Utilization

Affirming the inherent value of nonhuman creation, we support and encourage social policies that are directed toward rational and restrained transformation of parts of the nonhuman world into energy for human usage and that de-emphasize or eliminate energy-producing technologies that endanger the health, the safety, and even the existence of the present and future human and nonhuman creation. Further, we urge wholehearted support of the conservation of energy and responsible development of all energy resources, with special concern for the development of renewable energy sources, that the goodness of the earth may be affirmed.

Animal Life

We support regulations that protect the life and health of animals, including those ensuring the humane treatment of pets and other domestic animals, animals used in research, and the painless slaughtering of meat animals, fish, and fowl. We encourage the preservation of all animal species including those threatened with extinction.

Space

The universe, known and unknown, is the creation of God and is due the respect we are called to give the earth.

Science and Technology

We recognize science as a legitimate interpretation of God's natural world. We affirm the validity of the claims of science in describing the natural world, although we preclude science from making authoritative claims about theological issues. We recognize technology as a legitimate use of God's natural world when such use enhances human life and enables all of God's children to develop their God-given creative potential without violating our ethical convictions about the relationship of humanity to the natural world.

In acknowledging the important roles of science and technology, however, we also believe that theological understandings of human experience are crucial to a full understanding of the place of humanity in the universe. Science and theology are complementary rather than mutually incompatible. We therefore encourage dialogue between the scientific and theological communities and seek the kind of participation that will enable humanity to sustain life on earth and, by God's grace, increase the quality of our common lives together.

THE ECONOMIC COMMUNITY

Property

We believe private ownership of property is a trusteeship under God, both in those societies where it is encouraged and where it is discouraged, but is limited by the overriding needs of society. We believe that Christian faith denies to any person or group of persons exclusive and arbitrary control of any other part of the created universe. Socially and culturally conditioned ownership of property is, therefore, to be considered a responsibility to God. We believe, therefore, governments have the responsibility, in the pursuit of justice and order under law, to provide procedures that protect the rights of the whole society as well as those of private ownership.

Consumption

Consumers should exercise their economic power to encourage the manufacture of goods that are necessary and beneficial to humanity while avoiding the desecration of the environment in either production or consumption. Consumers should avoid purchasing products made in conditions where workers are being exploited because of their age, gender, or economic status.

And while the limited options available to consumers make this extremely difficult to accomplish, buying "Fair Trade Certified" products is one sure way consumers can use their purchasing power to make a contribution to the common good. The International Standards of Fair Trade are based on ensuring livable wages for small farmers and their families, working with democratically run farming cooperatives, buying direct so that the benefits and profits from trade actually reach the farmers and their communities, providing vitally important advance credit, and encouraging ecologically sustainable farming practices. Consumers should not only seek out companies whose product lines reflect a strong commitment to these standards, but should also encourage expanded corporate participation in the Fair Trade market.

Consumers should evaluate their consumption of goods and services in the light of the need for enhanced quality of life rather than unlimited production of material goods. We call upon consumers, including local congregations and Church-related institutions, to organize to achieve these goals and to express dissatisfaction with harmful economic, social, or ecological practices through such appropriate methods as boycott, letter writing, corporate resolution, and advertisement. For example, these methods can be used to influence better television and radio programming.

Family Farms

The value of family farms has long been affirmed as a significant foundation for free and democratic societies. In recent years, the survival of independent farmers worldwide has been threatened by various factors, including the increasing concentration of all phases of agriculture into the hands of a limited number of transnational corporations. The concentration of the food supply for the many into the hands of the few raises global questions of justice that cry out for vigilance and action.

We call upon the agribusiness sector to conduct itself with respect for human rights primarily in the responsible stewardship of daily bread for the world, and secondarily in responsible corporate citizenship that respects the rights of all farmers, small and large, to receive a fair return for honest labor. We advocate for the rights of people to possess property and to earn a living by tilling the soil.

We call upon our churches to do all in their power to speak prophetically to the matters of food supply and the people who grow the food for the world.

Corporate Responsibility

Corporations are responsible not only to their stockholders, but also to other stakeholders: their workers, suppliers, vendors, customers, the communities in which they do business, and for the earth, which supports them. We support the public's right to know what impact corporations have in these various arenas, so that people can make informed choices about which corporations to support.

We applaud corporations that voluntarily comply with standards that promote human well-being and protect the environment.
